

AIRTV

Wireless Innovation Group has developed “AirTV” which provides state-of-the-art television reception for consumers who have adopted the “Over The Top” (OTT) means of receiving their content without paying the high costs of cable subscription services. WIG has teamed up with top industry providers such as MaxLinear (www.maxlinear.com), ViXS Systems, Inc. (www.vixs.com), and Morega Systems, Inc. (www.morega.com) for market deployment and consumer base resources. AirTV's set-top box is a technology powerhouse that is powered with a quad-core processor, 60fps 4k ultra-HD viewing capability, and yet still designed to be a customer friendly, easy to use practical operating system. AirTV **can now deliver 200+ channels of HDTV quality content via WiFi** to its customers for free **without any contracts or monthly fees of any kind, from anywhere.** This includes **premium content providers such as Netflix, HBO, Amazon Instant, Hulu, Sky News, ESPN, Spotify, Pandora and many more.**

AirTV’s advanced WiFi capabilities allow any smart device (phones, tablets, laptops etc.) to connect and watch up to 4 different channels simultaneously. The app has built in recording and cloud based storage capabilities allowing the user to watch their content globally and at their leisure. This value add **creates a portal for recurring revenue opportunities** such as OTT services and IOT solutions, effectively creating new smart environment revenue streams.

ABOUT WIRELESS INNOVATION GROUP

Wireless Innovation Group, LLC is a multi-faceted, vertically integrated technology company specializing in developing and delivering to market proprietary "Next Generation" integration of Wideband Smart Antenna solutions, IOT (the Internet of Things), and M2M (Machine to Machine) applications and solutions for commercial and consumer applications around the world.

AIRTV - (CONTINUED)

A wireless set-top box lets you satisfy today's growing demand for feature-rich interactive video viewing experiences. Both boxes' two-way IP capabilities support the advanced interactive IP video applications your subscribers want from Electronic Program Guides (EPG) to advanced digital TV functionality like Video On-demand (VOD), multiple picture-in-picture capabilities, and time-shifted TV.

- Allows wireless input via a Wireless Access Point that lets you easily position or move your video entertainment system anywhere in your residence - or even outside - without network wires or cables.
- Offers High Definition TV (HDTV), with up to twice the color resolution and up to six times the sharpness of a standard TV when connected to an HD-capable TV
- Delivers a direct digital connection to consumer audio and video devices through multiple interfaces.
- Supports Electronic Program Guides (EPG) and Video On Demand (VOD), and Multi-room DVR as well as many Web/IP-delivered applications using rich advanced graphics
- Supports secure Digital Rights Management (DRM) with integrated Secure Processor
- Supports Over the Air (OTA) broadcast communications via WiFi providing the highest level of services with zero losses to the RF cable which is typically used in today's OTA solutions.
- Designed for easy launch in IP-based networks. The Set-Top Box is designed for ISPs, OTT- operators and content aggregators that provide services based on IPTV, OTT and VoD. AirHDTV contains a whole set of functions that are in high demand with operators, such as: playback of digital TV channels in high quality, streaming video support, and video on demand.
